

2026 Department of Computer Sciences Seminar - First day

40 presentations · 4-min slots · 2 breaks · 09:05 – 17:00

PhD student (21)	Internship (12)	Engineer (5)	Other (2)
------------------	-----------------	--------------	-----------

Time Slot	Presenter	Title
09:05 – 09:09	Presenter #1	N/A
09:09 – 09:13	Presenter #2	Documentation, spatial tracking and 3D Design
09:13 – 09:17	Presenter #3	Graduated explanation accessibility and appropriate reliance in ai-assisted maritime surveillance
09:17 – 09:21	Presenter #4	XR Researcher Internship – eCOM-VR - Profiling network solutions for Game Engines
09:21 – 09:25	Presenter #5	Immersive Narrative Visualisation for Understanding Autonomous Maritime Vessels
09:25 – 09:29	Presenter #6	Perception of Affordances and Embodied Interaction in Augmented Reality
09:29 – 09:33	Presenter #7	Dialog with autonomous systems, adaptive representation of data and decisions
09:33 – 09:37	Presenter #8	Explore representation's configurations to support an operator's awareness of an expert in Mixed Reality
09:37 – 09:41	Presenter #9	Collaborative exploration of alternative problem-solving approaches for the factory of the future using virtual and augmented reality
09:41 – 09:45	Presenter #10	Collaborative authoring of the Digital Twin in AR and VR
09:45 – 09:49	Presenter #11	TwinDevOps: an automated process for the deployment and dynamic evolution of digital twins
09:49 – 09:53	Presenter #12	Generic multiverse architecture for designing and executing digital twins
09:53 – 09:57	Presenter #13	N/A

Time Slot	Presenter	Title
09:57 – 10:01	Presenter #14	N/A
10:01 – 10:05	Presenter #15	Federated Evolution of Dynamic Security Consistent Models
10:05 – 10:09	Presenter #16	5G Packet Watermarking
	<i>10:09 – 10:24 — Coffee break</i>	
10:24 – 10:28	Presenter #17	Towards a new generation of probes for monitoring encrypted traffic
10:28 – 10:32	Presenter #18	Explainable Intrusion Detection- Improving SHAP Efficiency
10:32 – 10:36	Presenter #19	Embedded AI security to support in-network intrusion detection probes
10:36 – 10:40	Presenter #20	What can be learnt from adversarially corrupted data?
10:40 – 10:44	Presenter #21	Enhancing the qualities of blockchain within a dynamic network for industry 4
10:44 – 10:48	Presenter #22	Proactive defense intended to improve the security of virtualised networks
10:48 – 10:52	Presenter #23	Aggregation of High-Size Instances on a Coarse Space to Solve Optimization Problems
10:52 – 10:56	Presenter #24	Safe & explainable foundation models
10:56 – 11:00	Presenter #25	Drone & USV Security
11:00 – 11:04	Presenter #26	N/A
11:04 – 11:08	Presenter #27	N/A
11:08 – 11:12	Presenter #28	N/A

Time Slot	Presenter	Title
11:12 – 11:16	Presenter #29	Robot Action Planning with Vision Language Models (VLMs)
11:16 – 11:20	Presenter #30	Human-Drone Teaming in Unstructured Outdoor Environments Using Event-Based Cameras
11:20 – 11:24	Presenter #31	Conversational Flow and Dialogue Management in a Social Robot using a Knowledge Graph
11:24 – 11:28	Presenter #32	Summarization of activities of daily living using sound-based activity recognition
11:28 – 11:32	Presenter #33	Language & vision-based mobility assistance for visually impaired people
11:32 – 11:36	Presenter #34	Corporate knowledge-guided recommendation in a BI context
11:36 – 11:40	Presenter #35	Understanding and explaining inequalities in education using data mining and machine learning methods
11:40 – 11:44	Presenter #36	N/A
11:44 – 11:48	Presenter #37	Learning path recommendation
11:48 – 11:52	Presenter #38	Explainable AI for fuzzy rule-based decision systems.
	<i>12:00 – 14:00 — Lunch Break</i>	
14:00 – 15:30		Demonstrations
15:30 – 17:00		Panel
